EDUCATION

University of Cincinnati | Cincinnati, OH

Graduating: May 2028

B.S. in Computer Science

GPA: 3.6

- **Relevant Coursework:** Software Engineering, Data Structures, Python Programming, Design & Analysis of Algorithms, Database Design/Development, Intro to Computer Systems, Info Security & Assurance, Discrete Structures, Calculus I & II, Linear Algebra

SKILLS

Languages: Python, JavaScript, C#, C++, SQL, HTML/CSS

Frameworks & Technologies: Appium, Node.js, .NET, Git/GitHub, PostgreSQL, Flask

Tools: Power BI, Jira, HeadSpin, Word, Excel, PowerPoint

EXPERIENCE

Crown Equipment Corporation | New Bremen, Ohio

Jan 2025 – May 2025 | Aug 2025 – Dec 2025

Computer Science & Engineering Co-Op

- Developed Python scripts utilizing the Appium framework to automate 120+ truck display tests to increase test throughput, repeatability, and feature coverage.
- Debugged embedded vehicle control software (C) and tablet display applications (C#) to validate safety, logic, and operator interactions.
- Integrated TestRail API and Power BI to compile test results across all products and releases for streamlined reporting.
- Created and deployed a WPF/C# password-management utility, enabling consistent and secure truck service-password updates across Crown's sites and plants.

Arby's | Columbus, Ohio

Jul 2021 – Aug 2024

Team Member

- Entrusted with the responsibility of training new employees in the drive-through and fry stations.
- Executed effective teamwork when keeping drive through interactions under 200 seconds.
- Adhered to proper cleaning and health procedures.
- Exhibited flexibility and knowledge of working at different stations, sometimes multiple at once, such as order taking, food preparation, and cashier.
- Processed and handled \$1500 in transactions in the usual 8-hour shifts.
- Awarded Team Member of the Month for all of 2022.

DataField Technology Services | Worthington, Ohio

Aug 2022 – Dec 2022

Intern

- Shadowed employees and experienced the day-to-day activities of a telecommunication company.
- Facilitated design choices by taking photos for the company website and helping to choose a new company email signature.
- Composed and presented a report on whether to renew or upgrade a copier contract.
- Utilized Excel to place Columbus Blue Jacket home games into an event schedule to help plan meetings with potential business partners.
- Designed a calendar application with the help of a mentor to track information concerning the internship including the mentor that was shadowed and daily notes.

PROJECTS

YouTube-to-MP3 Converter & Metadata Editor | [GitHub Link](#)

- Developed a media processing web application that extracts audio and enables MP3 conversion and metadata editing using Node.js, Python, yt-dlp, and FFmpeg.

Todo App Web Application | [GitHub Link](#)

- Developed a multi-user RESTful API with role-based access control using Flask and JWT authentication, featuring student and admin privilege enforcement across journal, task, and reminder management endpoints with 90%+ Pytest coverage.
